

PreDrip Documentation Roadmap

Dokumentasi dibuat bertahap agar keputusan produk, riset, desain, teknis, database, sampai development tidak saling tumpang tindih.

No	Dokumen	Status	Output
1	Business Requirement	Done	01-business-requirement.md
2	Product Requirement Document (PRD)	Next	02-product-requirement.md
3	User Research	Pending	03-user-research.md
4	User Flow	Pending	04-user-flow.md
5	Wireframe	Pending	05-wireframe.md
6	UI Design	Pending	06-ui-design.md
7	Technical Design	Pending	07-technical-design.md
8	SRS	Pending	08-srs.md
9	SDD / Architecture Design	Pending	09-sdd-architecture-design.md
10	Database Design	Pending	10-database-design.md
11	Task Breakdown	Pending	11-task-breakdown.md
12	Development	Pending	12-development.md
13	Testing	Pending	13-testing.md
14	Deployment	Pending	14-deployment.md
15	Maintenance	Pending	15-maintenance.md

Baseline Product Decision

- Produk: PreDrip.
- Platform awal: web application.

- Stack awal: Node.js, Next.js App Router, TypeScript, PostgreSQL.
- Backend awal: Next.js full-stack dengan Server Actions/API route sesuai kebutuhan.
- ORM rekomendasi: Prisma.
- MVP pertama: authentication foundation.
- Auth scope awal: register, login, logout, forgot password, reset password, password hashing, session, role dasar.

Dokumentasi Berikutnya

Tahap berikutnya adalah PRD. PRD akan menurunkan Business Requirement menjadi:

- persona dan user role,
- scope MVP,
- feature list,
- user stories,
- acceptance criteria,
- edge cases,
- non-functional requirement,
- release milestone.
